Skills

Circuit Design - Proficient in PCB Design.

Programming Languages: Skilled in Python, CSS, HTML & Javascript;
experienced with React.js, Node.js, Mongoose, Express & SQL

Software and Technologies: Proficient in Git, CAD, and Arduino Programming;
adept with VSCode, Google Collab, and Advanced Excel.

Education

SEP 2023 - APR 2027

SRM UNIVERSITY, KTR - Bachelor of Technology, Electronics and Communication Engineering

CGPA - 8.86 out of 10

Relevant Coursework : Python , Arduino Programming , PCS Design , Machine Learning

Experience

Projects

Fingerprint Door Lock System with Arduino

Developed a Fingerprint Door Lock System, implemented on an Arduino UNO & Bluetooth Module. This project involved interactive system that control Home Security system with modern technology

Spotify Clone ([GitHub](#))

Developed frontend of a Spotify A popular song streaming website , used to listen latest music and popular artist with HTML and vanilla CSS. Make sure that the project is responsive with devices .

Diamond Price Predictor ([GitHub](#))

This project helps identify the price of a diamond using a machine learning algorithm. I used a dataset from Kaggle to develop and train the model, making this project a reality.
